

**Everybody - Everyday - For Life!™**

D-Sufficiency contains Vitamin D3 from lanolin in a base of olive oil. Vitamin D supports the health and function of the immune and nervous systems, supports neuromuscular function, and plays a role in the maintenance of healthy blood sugar levels in healthy people. Vitamin D supports the health of both the growing baby and mother during pregnancy. Vitamin D helps calcium absorption and a diet deficient in calcium can lead to osteoporosis in later life. It helps to maintain serum calcium and phosphorus levels, which is critical for the normal development of strong bones and teeth. Vitamin D supports the development of strong, healthy bones and the maintenance of bone mineral density which helps to reduce the risk of fracture.
